CERTIFIED COMPANY

CELEBRATING

# 30

years

## COMPANY PROFILE

Since our inception in the 80's we have been market leaders in the design, development and manufacture of cranes and other material handling equipment in the country. With our dedication to unyielding quality and a devotion to value for money in terms of the utility and product diversity, we are able to offer our clients a vast range of products today which come with a rich history and a veritable reputation.

At our manufacturing units in Cherlapally which sprawl over 2,00,000 sq.ft, an army of highly qualified, experienced and versatile workforces strives to cater to a growing market's needs. Our cranes are used in a wide variety of fields and for a varying set of purposes. These include Steel plants, Sugar plants, Cement plants, Power plants, Fabrication units, Granite plants, etc. The current lifting capacity of our cranes is up to 200 Tons, but we are fully equipped to handle ranges beyond this as well.

In order for us to stay ahead of the curve and provide our clients with impeccable cranes, we constantly research the latest innovations and progresses in manufacturing and we also continually employ the use of only the best in class equipment and materials. Our facility confirms to national and international quality standards and the products we manufacture are each a standing testament of the dedication, qualification and expertise of our team.

## OUR PRESENCE

We have transcended national boundaries, and we have long standing relations with companies in Iran, Africa and many countries in the Middle East. It is our reputation for timely service, value for money and high quality goods that forged these relations. Many more projects are coming up though out the world which will mark the presence of Shivpra Cranes in the coming years.

## QUALITY CONTROL AND ASSURANCE

Shivpra Cranes has been certified by Bureau Veritas Certification Pvt Ltd as an ISO 9001:2008 company.

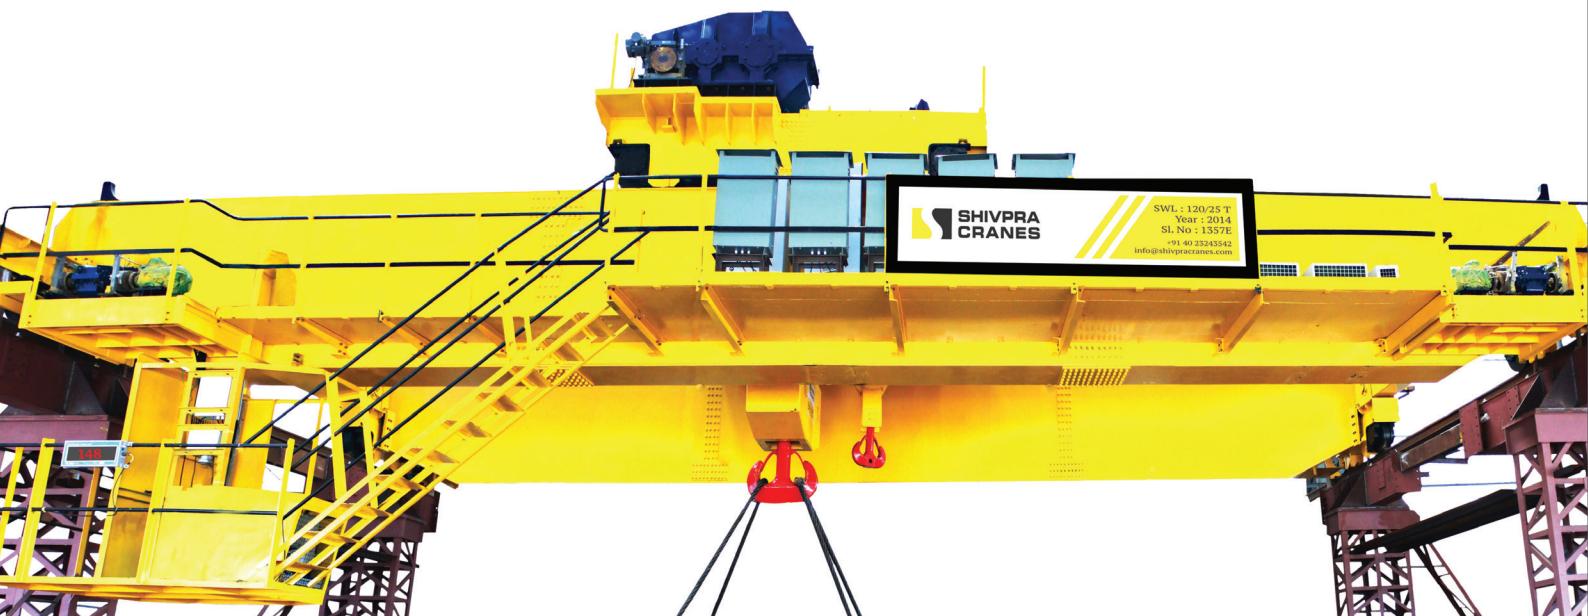

At our facility, we have a complete team of quality control experts to keep track of the quality at every stage. More than 40 experts monitor and closely track every product's development from its birth in raw materials to its final assembly and delivery.

We manufacture all our products in conformity with IS standards such as IS 807, IS 3177, IS 4137, etc. Such a system ensures that every product we make is subjected to a highly meticulous set of standards and checks which adds value to its utility and guarantees its quality.

## THE SHIVPRA LEVERAGE

Here at Shivpra, we maintain a fully stocked after-sales service department. This means that at any given time, we are fully equipped technically and knowledge wise to handle any repairs or maintenance on any crane. Our massive spare parts inventory helps us deal with a wide variety of situations for any kind of crane. This endeavor of ours enables us to offer a zero downtime policy to our clients. All the mechanical components are manufactured in house so that we can run them through our high quality testing measures.

Providing prompt and accurate service is our forte and we have a complete bank of dedicated engineers who can provide timely and on-site help with not only cranes that have been manufactured by us but those manufactured by other companies as well.

## DOUBLE GIRDER EOT CRANES

Shivpra Cranes offers a wide range of Double Girder EOT Cranes that conform to various Indian Standards. Engineered precisely and designed specifically, these cranes are renowned for delivering optimal output and with smooth functioning capabilities, make the task of loading, unloading and movement of material effortless and unproblematic, while preventing any kind of damage to the material.

### Standard advantages of Shivpra's Double Girder EOT Cranes:

- Uncomplicated installation, trouble-free maintenance, dependable and optimum hoisting capacity.
- Utmost rigidity with least possible dead weight, compact dimensions and superior efficiency to conserve power.
- Jerk free and smooth performance.

Standards	IS 3177, IS 4137, IS 807
Capacity	Up to 200 Tons
Span	Up to 65 Mts.
Lift	Up to 200 Mts.

## GANTRY/GOLIATH CRANES

With a repute of manufacturing and supplying high load bearing Gantry Cranes of varying sizes over years, Shivpra has acquired a widely diversified client base. Predominantly used in outdoor yard they are also utilized in indoor operations, they offer distinctive lifting flexibility. They are highly adaptable cranes that are used in a wide variety of purposes across every field.

Our Gantry cranes are manufactured with high load bearing capacities and come in varying sizes. These cranes are used across various areas such as Ports, Shipping yards, Ship Building industries, Construction sites, Irrigation projects, Dams and Scrap Yards, etc.

Their low maintenance designs and cost effective operations allow for very heavy duty operating hours.

Standards	IS 3177, IS 807
Capacity	Up to 200 Tons
Span	Up to 65 Mts.
Lift	Up to 250 Mts.

## STEEL MILL DUTY CRANES

These are heavy duty, high speed cranes which are built for continuous operation. At Shivpra, we design each of these cranes from the ground up, keeping in mind the requirement of the customers. These cranes operate in very harsh conditions with high temperature in dusty environment. Due to the extremely rugged nature of the work they are built for, they are given the cream of our resources.

Hundreds of Shivpra manufactured Steel mill duty Cranes are working to the satisfaction of our customers in various steel plants. Repeated orders from them are a testimony of their satisfaction towards our product.

A thorough understanding of the plant followed by customized designing, fabrication, timely delivery and dedicated after sales service has helped us in achieving the customer base that we now enjoy.

Standards	IS 4137, IS 807
Capacity	Up to 200 Tons
Span	Up to 65 Mts.
Lift	Up to 40 Mts.

## TRANSFER CARS/TROLLEYS

Transfer cars/trolleys are generally used to transfer scrap, Sponge Iron, steel, ladle and other such materials.

They are also expected to perform a variety of tasks such as tilting, steering and so on. They are continually exposed to heavy loads, dust, heat and a variety of such factors and thereby we design them such that they are reliable, sturdy and maintenance free.

At Shivpra, the entire range of transfer cars and trolleys are designed to ensure that they can be used in any given set of conditions. We manufacture trolleys that have varying ranges of capacities extending up to 200 Tons.

Standards	IS 3177, IS 4137
Capacity	Up to 200 Tons

**SHIVPRA  
CRANES**

Year : 2015

SWL : 7.5 T

SI.No : 1465SG

## SINGLE GIRDER CRANES

Single Girder Cranes are generally used in production units and warehouses where space maybe a constraint. These overhead or under slung cranes can be fitted across different floor areas according to the need of productivity.

### **Shivpra's single girder cranes offer the following advantages:**

- Cost effective solutions for optimum utilization of space
- Light weight and compact construction
- High stability and very low dead weight
- Low load on the crane runway and the building structure
- Maximum hook approach

Standards	IS 3177, IS 807
Capacity	Up to 25 Tons
Span	Up to 35 Mts.
Lift	Up to 20 Mts.

## CANE UNLOADER CRANES

Cane unloaders are primarily used in the sugar industry while processing sugar-cane in bulk.

We design and deliver state of the art Grab/Sling type unloaders which unload the canes from vehicles automatically with a single man operation. Unloaders with feeder tables are also available with us.

Ease of operation and a sturdy, easy to maintain design makes these unloaders highly formidable in terms of utility.

A complete package of columns, gantry girder, Rail and Tie along with the Grab can also be availed from us.

Standards	IS 3177, IS 807
Capacity	Up to 25 Tons
Span	Up to 30 Mts.
Lift	Up to 15 Mts.

## FLAMEPROOF CRANES

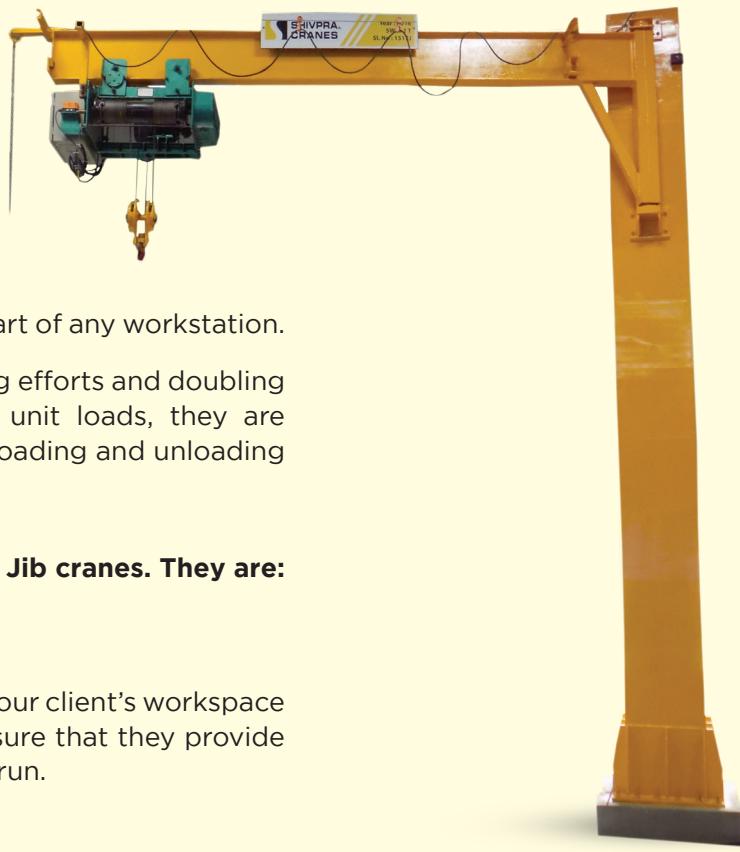

Flameproof cranes are mostly used in areas where the crane is exposed to explosive gases. All parts of the crane system are forged from the highest quality raw materials to deliver time-tested performance.

The drive in our flameproof cranes consists of flameproof motor, brakes, switches,

control panels and push buttons. All electrical fittings are also flameproof and are suitable for Gas groups I, II A and II B.

Flameproof/Explosion protected technology is used in many industries such as Chemical and petro-chemical, mining, power generation, food and pharmaceutical industries, etc.

Standards	IS 2148, IS 3177, IS 3938, IS 807
Capacity	Up to 50 Tons
Span	Up to 30 Mts.
Lift	Up to 20 Mts.

## JIB CRANES

Jib cranes are an indispensable part of any workstation.

They assist workforces in reducing efforts and doubling the workflow. They can handle unit loads, they are highly flexible and they assist in loading and unloading materials on the floor.

**There are primarily two types of Jib cranes. They are:**

- Wall mounted Jib cranes.
- Column mounted Jib cranes.

Jib cranes are made according to our client's workspace layout and are customized to ensure that they provide optimal performance in the long run.

Standards	IS 15419, IS 3177
Capacity	Up to 10 Tons
Arm Length	Up to 10 Mts. With 180/360-degree rotation
Lift	Up to 10 Mts.

## HOT CRANES

Hand Operated Overhead Travelling Cranes are highly versatile and relatively compact compared to other models of cranes. They are highly useful in workshops and plants where the space is constrained.

We design these in varying sizes and capacities.

Since their average usage is very high, we design every part carefully to ensure their performances in the long run.

Standards	IS 3177, IS 807
Capacity	Up to 20 Tons
Span	Up to 25 Mts.
Lift	Up to 30 Mts.

## SEMI EOT CRANES

Semi EOT cranes are generally used in workshops and warehouses for lifting and transporting heavy loads.

Shivpra's range of Semi EOT Cranes are known for their high load bearing capacity, long working life and resistivity to abrasion and corrosion.

### Standard advantages of Shivpra's range of Semi EOT cranes:

- Reliable performance.
- Low maintenance.
- Application specific design..

Standards	IS 3177, IS 807, IS 800.
Capacity	Up to 25 Tons
Span	Up to 15 Mts.
Lift	Up to 10 Mts.

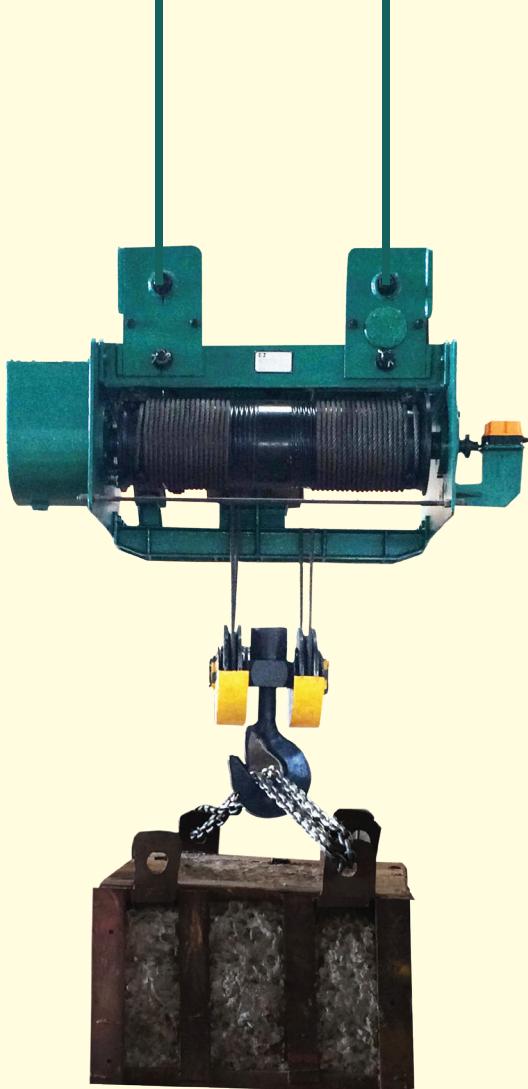

## SEMI GANTRY CRANES

Semi gantry cranes are used in workshops where part utilization of the shop bay is required. In such a profile, one end-carriage of the rail travels on regular gantry rail while the opposite end-carriage travels on a rail that is mounted either on the ground or at a lower elevation.

We design and build these crane systems in different sizes and with varied load bearing capacities according to our client's specifications.

Minimal time is required to assemble these cranes, resulting in low costs for erection and commissioning.

Standards	IS 3177, IS 807, IS 800.
Capacity	Up to 20 Tons
Span	Up to 15 Mts.
Lift	Up to 10 Mts.

## ELECTRIC HOISTS

Shivpra Cranes manufactures a full range of precision-engineered Electric Hoists consisting of chain hoists and wire rope hoists.

Powered by our dedication to quality and utility, our entire range focuses on providing load capacities, headroom requirements, hooking arrangements and lift heights depending on our customer's requirements.

We also make available electric trolleys with our hoists.

Standards	IS 3938, IS 807
Capacity	Up to 40 Tons

## GRAB BUCKETS

Grab buckets are used to handle Sponge Iron, Scrap Iron, Mill Scale, Limestone, Coal, BFG Slag, Fertilizers and other such materials.

These are powered mechanically or hydraulically and are very durable and easy to operate.

Standards	IS 2062, IS 1570
Capacity	Up to 10 cu.m

## BOTTOM BLOCKS

We offer a wide range of bottom blocks that are designed and manufactured in accordance with the Indian Standards.

We stock complete bottom block assemblies in a wide variety of sizes and configurations and we also stock the items such as hooks, frames, pins, sheaves, bearings and safety latches that commonly wear out.

Our bottom blocks are made to accurate dimensions and are sturdy, corrosion resistant and robust in nature with high tensile strength and have a very long life.

Our professionals work in co-ordination with the customers to bring them the most advanced range of hook blocks as per their specifications.

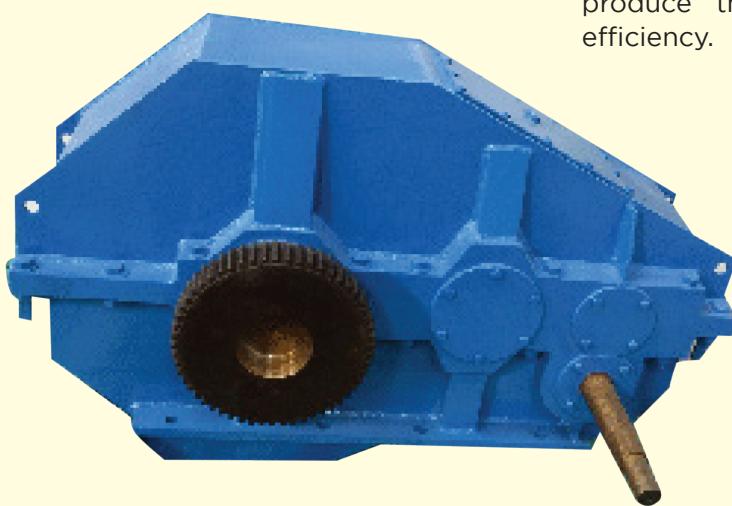

We manufacture bottom blocks currently up to 200 Tons lifting capacity, however we are equipped to manufacture bottom blocks with higher lifting capacities as well.

---

## GEARBOXES

We have a large range of gearboxes which are manufactured in-house with high quality raw material. Our crane-duty gearboxes are very durable , robust and reliable.

Accuracy and precision are maintained throughout the manufacturing process to produce the final product with maximum efficiency.

## **SERVICE & MAINTENANCE**

Our team of experts can assess, repair and rectify any crane in the country. Shivpra Cranes offers the complete spectrum of engineering services for cranes with total design, fabrication and installation. We also provide cost estimates and contracting services for repairs, modification, refurbishment and enhancement of the crane capacities.

We handle Crane Engineering tasks for other brands of cranes as well.

Our turnkey services in this regard include field consultation, inspections, calculations, feasibility analysis, reports, designs, drawings, reverse engineering, fabrication and machining, field supervision, etc.

Shivpra Cranes offers customized services 24/7 throughout the year. Our After-sales staff and engineers guide the customers towards the safest and most economical solutions, whether it is a standard crane system or a crane system requiring specialized engineering or a complete gantry application.

Our highly skilled technicians provide our customers with service on any type of industrial equipment. The service and follow-up measures ensure that our products deliver the best performances. It is of primordial importance to us that we maintain customer satisfaction on a continuous basis.

We offer a variety of preventive maintenance programs for most makes and types of lifting equipment. A thorough set of inspections and analyses is carried out by our servicing team who then provide inputs for optimizing product performance while keeping costs and loads balanced.

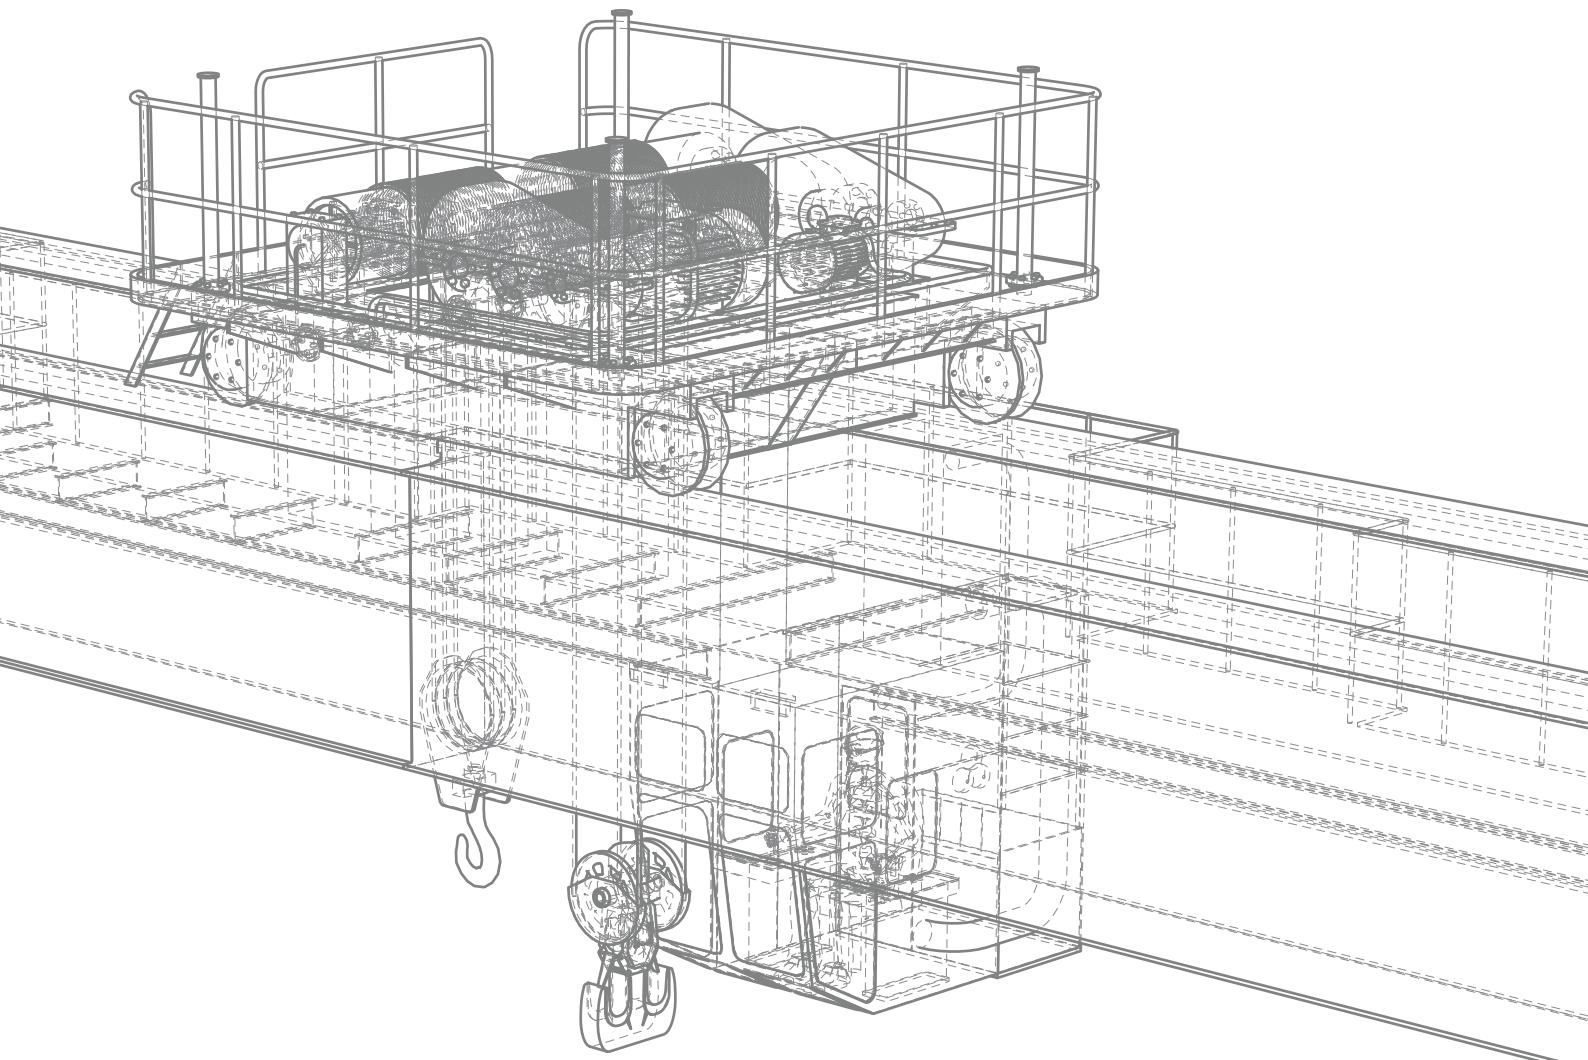

Our Preventative Maintenance Programs are developed to ensure maximum uptime in your facility.

### **KEY FEATURES:**

- Availability of genuine spare parts.
- 24/7 on call breakdown service.
- Crane Inspection.
- Preventive maintenance and overhauling.
- Modification and Relocation of Cranes.
- Annual Maintenance Contracts.

Kindly contact us regarding any questions you may have about installation, servicing and optimizing your material handling equipment.
